

IMPACT REPORT 2024-2025

NGARLAK KAATIJ WADANDI YOONGAN JARLI WADANDI BOODJA

Nature Conservation would like to acknowledge the Wadandi people, the Traditional Custodians of Wadandi boodja, whom we work alongside in our care for Country.

We recognise their deep, continuing connection to land, water, sea and culture.

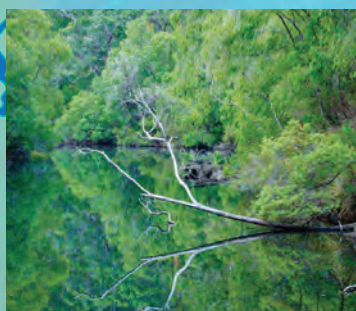

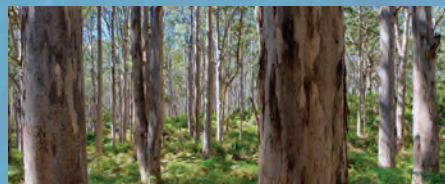

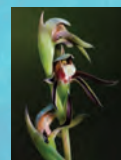

We pay our respects to their Elders past, present, and those who follow in their footsteps.

Like Nowhere Else on Earth

CHAIR'S MESSAGE

Kaya!

What a year we've had with a lot of changes and successes as we continue to work hard on our mission to connect, respect and act for nature.

I'd like to thank everyone who has contributed to the success of Nature Conservation this year.

Funders. Partners. Supporters.

We greatly appreciate your contribution, and your ongoing commitment to this region.

With your support, we become a community and a force that can create significant outcomes for the biodiversity of our region which is unique but under threat.

Further, I would like to acknowledge the ongoing, consistent work of our incredible group of volunteers without whom the task of protection and restoration of biodiversity would not happen.

Changes afoot...

We are thrilled to welcome Aaron Jaggar taking over the helm as the new CEO of NCMRR. Aaron comes with a wealth of experience in conservation and environmental management, both in Australia and New Zealand.

Our fantastic General Manager Drew McKenzie stepped down, after having been in the role for 3 years (20 years to date NCMRR!) and we are grateful he took our organisation to a whole new level. We are so pleased he will continue his biodiversity work with us.

We wish the awesome Fran Dohring a wonderful retirement, and thank her for her 19 dedicated years, as well as the wonderful Tracey Muir who was with us for 17 years.

The board welcomes Suzanne Hillier (our new treasurer) and Natalie Chambers, in addition to advisors Charles Johnson, Caroline de Mori and Jonelle Kapsalos who all share their amazing knowledge and skills with our team. This support gives us the ability to extend our reach and messaging.

We also have some new vibrant staff who bring a wealth of life experience to our programs, please make sure you look at the Staff section at the back of this report and read about them if you haven't already. We welcome them to Nature Conservation, and are glad they're here.

Where to from here...

We are now focussing our attention on developing a Capes Biodiversity Initiative which will be a multidisciplinary, scaled approach to protect and restore biodiversity, to give this Capes region greater resilience into the future. If you are reading this impact report, you are likely a vital part of this strategy, and we look forward to working with you to implement this visionary plan.

Together, by being custodians, we have a strong impact on the health of our environment. We live in a very special place and what we do really matters, now and into the future.

DR ANN WARD
CHAIR BOARD OF MANAGEMENT

CEO's MESSAGE

It has been a privilege to join Nature Conservation Margaret River Region this year and to lead such a passionate and committed team. I was drawn to this role by the unique opportunity to protect and restore one of Australia's most iconic and biodiverse landscapes, while working closely with the community that calls this region home.

With more than 15 years' experience leading conservation programs across New Zealand and Australia, I've seen first-hand the power of collaboration between Traditional Owners, community groups, volunteers, government, and businesses. Our region faces significant environmental pressures – from climate change and habitat loss to increasing development – but it also has a strong foundation of local action and a shared determination to make a difference.

Over the coming year, our focus will be on scaling up our efforts to protect and connect key habitats across the Leeuwin–Naturaliste Ridge and beyond. This includes strengthening partnerships, growing our community engagement, and building the resources we need to deliver lasting conservation outcomes.

I'm inspired every day by the volunteers, landholders, and partners who dedicate their time and energy to protecting this incredible place. Together, we can ensure the Margaret River region remains a thriving, resilient landscape for future generations.

Thank you for welcoming me so warmly into the community and for your ongoing support of Nature Conservation Margaret River Region's vital work.

I'd like to thank everyone who has contributed to the success of Nature Conservation this year. We are a team that is producing important outcomes for nature. Alongside the hard work of our incredible group of dedicated volunteers, without whom the protection and restoration of biodiversity would not happen.

Huge thanks also - to all our funders, partners and supporters. We so appreciate you, and your ongoing commitment to this region.

Together, by being custodians, we have a strong impact on the health of our environment. We live in a very special place and what we do really matters, now and into the future. Thank you.

A handwritten signature in black ink, appearing to read 'A. K. Jaggar'.

OUR MISSION

TOGETHER WITH NATURE

Nature Conservation is dedicated to the protection and restoration of biodiversity.

We **CONNECT** people to nature, landscape and place.

We build understanding and **RESPECT** for Boodja.

We facilitate, support and give people the tools to **ACT** for nature.

CONNECT | RESPECT | ACT

PRINCIPLES

Act with integrity

Collaborate to increase reach, impact and ownership

Focus on long-term and landscape scale difference

Avoid activities that are detrimental to our goals

Commit to monitoring, data collection and sharing

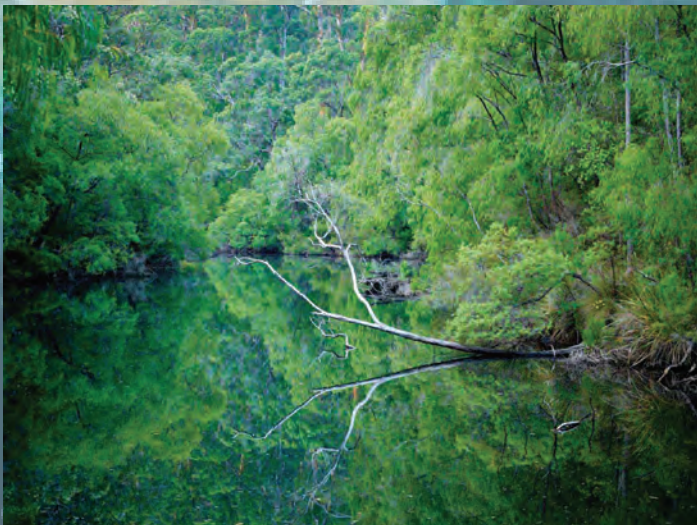

Provide leadership and advocacy on local environment issues

Acknowledge, engage, support and partner with local cultural custodians

TWO PILLARS OF FOCUS

WOODITJUP BILYA

CARING FOR THE CAPES

***“Nature Conservation events
and workshops are fascinating
- and a fabulous and easy way
to meet like-minded people.”***

**Helen Bradbury,
Volunteer, member, donor**

2024-2025 FINANCIAL REPORT

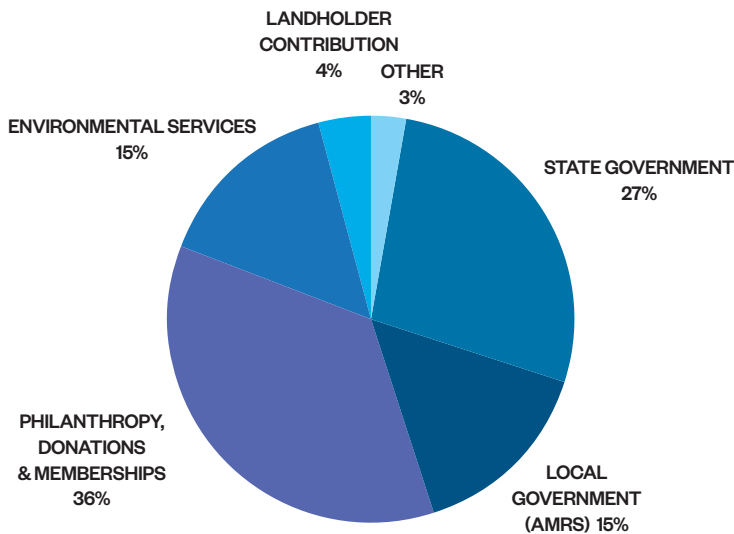

Nature Conservation has continued to thrive and grow in 2025, expanding our environmental education outreach, our advocacy work and delivering significant biodiversity protection for the Capes region.

We value the supporters, partners and funders who are consistently in our corner, investing their time and resources to collaborate with us for the protection and restoration of our unique natural environment and all its communities. We are grateful to have worked with such inspiring, knowledgeable and passionate individuals / organisations and know this crucial work completed in 2024/2025 would not be possible without them.

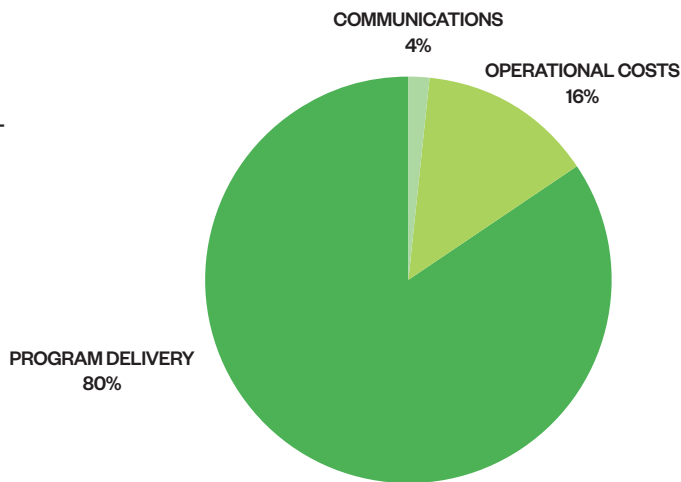

We are proud to report additional in-kind support at \$370k- a conservative estimate of the contribution of volunteer time by the community and board to our programs and organisation.

LEADERSHIP AND ADVOCACY

One of Nature Conservation's core principles is to provide leadership and advocacy on local environment issues. Amongst many programs delivering on this, one key element involves us making comment and submissions on policy, development proposals and legislative change. We feel that this role is critical in the protection of biodiversity in a landscape that is experiencing rapid population and visitor growth. Whilst we remain very much a grass roots organisation, undertaking the bulk of our work with the community and on the ground, it is important that we also use our local knowledge to proactively pursue world-class environmental management of the Margaret River Region.

"I'm really grateful for the expertise, guidance & framework NCMRR offers, which enables us to get involved so easily & thoroughly. Brava!"
NCMRR Member & Volunteer

CONSERVATION SUNDOWNERS

The Sundowner Series has continued to grow into a much-loved calendar of community gatherings focused on connection, inspiration, education and robust discussion. With the support of the Shire of Augusta Margaret River Community Events grant we were able to run three well-attended events and are proud to say we are now in a position to offer complimentary tickets to all teachers in our region.

Keynote speakers in 2024-2025 included:

- Dr Sophia Callander, Ecologist, Australian Wildlife Conservancy
- Dr Simon Cherriman, ornithologist / environmental biologist
- Dr Kath Lynch, DWER
- Professor Michael Douglas, Resilient Landscapes Hub, UWA
- Clare Forward, DBCA
- Hannah Weir (formerly Gulliver) REWILD Perth NRM
- Zac Webb, Wadandi Cultural Custodian
- Professor Hans Lambers, Plant biologist
- Rick Ensley, Bush Regenerator
- Obelia Walker, Biodiversity Officer, NCMRR
- Mathew Bowman, Water Corporation

A middle-aged man with a receding hairline is smiling broadly, showing his teeth. He is wearing a dark grey or black zip-up jacket. The background is a soft-focus forest with green foliage and tree trunks.

“I get back so much more than I give at your events.

Sure, I do some weeding or planting, but I come away with so much knowledge and inspiration”

Andrew Green, volunteer, member

ENVIRONMENTAL EDUCATION

Our award winning Environmental Education work encompasses three unique programs working with grades 3 to 6 across the region. We now work across twelve schools to build understanding and connection to our landscape and provide students with opportunities to actively contribute to caring for it. We connect them with cultural custodians, local experts and community volunteers to build authentic experiences and real-life learning opportunities.

1,068

our landscape

OUR PATCH

Our connection to place is intertwined with a sense of belonging to community and a shared sense of stewardship. Using inquiry-based learning, Our Patch happens out in the local environment. School communities are motivated to learn through student questions, through a sense of purpose and authenticity to address actual 'real world' tasks and concerns.

Highlights included:

- 7 primary schools engaged,
- 433 students participated in the program
- 5368 student hours of environmental education in class and on country.
- Over 20 community partners shared their knowledge and principles of environmental stewardship with school groups
- 113 excursion/incursion sessions

ADOPT A SPOT

Connecting every school in the Cape to Cape region with a nearby bushland or coastal reserve.

Through much valued, consistent commitment from major partner, Line in the Sand, 2024/2025 has welcomed the expansion of this program, with the addition of three new primary schools - Adopt a Spot 'North.'

Highlights included:

- 9th year running
- Now delivered across 12 schools
- 545 students engaged
- 2,142 student hours engaged
- 780 native plants established

WAATU KAATIJIN (OCEAN LEARNING)

Through Waatu Kaatijin, students study, identify marine threats, engage with stakeholders, propose and implement conservation measures, and share their knowledge with the community. Fostering a sense of responsibility, Waatu Kaatijin equips students with problem-solving, reflection, and practical skills for marine conservation.

Highlights included:

- 90 students participated
- Marine Expert Panel / Workshop designed for maximum local relevance
- Immersion Day featuring 9 marine expert-led sessions focused on the cultural and ecological importance of Gnarabup Beach and key environmental threats, to guide future projects addressing these issues
- Ocean Connection Day with 5 presenter-led learning sessions at the rivermouth
- 990 student hours accumulated

STRATEGIC ENVIRONMENTAL WEED CONTROL ARUM LILY BLITZ / WOODY WEED CAMPAIGN

Both funded by the Western Australian Government's State NRM Program, the Arum Lily Blitz campaign began in 2019 to prevent Arum Lily from outcompeting native vegetation and dominating our landscape, and the Woody Weed campaign is tackling invasive woody weeds (Sydney Golden Wattle, Sweet Pittosporum, and feral olives) that threaten remnant bushland, increase fire risk, and undermine native ecosystems.

The Arum Lily Blitz has demonstrated that the toxic weed's spread is unacceptable to thousands of people. There are currently over 2200 properties registered with the Arum Lily Blitz across 26,000 ha, with hundreds joining the campaign each year. Landholders are undertaking arum lily control on their properties doing the work themselves or employing spray contractors. This high level of interest and engagement inspires us and drives the campaign.

“It looked overwhelming and was very disheartening...”

***“The results were incredible.
“Now, there are heaps of birds, mostly the little understorey birds – the fantails and honeyeaters. We also have heaps of black cockatoos coming to eat the marri seed. And possums – mainly ringtails, quendas of course, and frogs as well. ”***

"The event was exceptionally well organised. I am new to living in the region and felt increased connection to place and people."

Workshop attendee

"We are all custodians. Thank you for the incredible work you do. We need you to help us look after country; we can't do it on our own"

Zac Webb, Undalup Cultural Custodian

PROTECT WOODITJUP BILYA (MARGARET RIVER)

The Wooditjup Bilya is of great cultural and environmental significance. It is iconic and recognised as one of the healthier rivers in the southwest. However, it faces significant threats and its protection represents one of the core priorities for our organisation. We were thrilled to have received the Ian Potter Foundation funding in 2024, and commence the significant four year Protecting Wooditjup Bilya project, with additional funding from State NRM, Water Corporation and the program's founding partner – the Pater Charitable Fund.

Meanwhile, the Friends of Wooditjup Bilya program has continued to make tangible impact towards the protection and restoration of Wooditjup Bilya by building community understanding and connection to the river through diverse speakers and event leaders including scientists, cultural custodians, river carers and conservationists. It has actively tackled degradation along the river foreshore through community action and supported volunteer events, every FoWB event held has booked out promptly and the volunteer database of river custodians grows continually. Both programs will work well together for maximum impact.

Important work towards this during the year included:

- 900m fencing along one of the last sections of unfenced main channel river foreshore
- Partnering with local farmers and landholders to repair degraded zones beside a priority refuge pool.
- Strategic environmental weed control throughout the catchment
- Wooditjup Bilya Collaborative Management Group continues to reinvigorate cross-agency implementation of the protection strategy.
- Scientists and experts connecting with schools and the community about the values, threats and action needed.
- 'Turtle trackers' formed to collect information on the Southwestern snake necked turtle.
- Catchment tour highlighting the values and threats to the river and our project impacts

CARING FOR COAST

In partnership with Line in the Sand this program collaborates with cultural custodians, local volunteer coastcare groups, boardriders, Local Government and DBCA to engage people in on ground coastal protection and restoration.

Significant highlights from the year include:

- Collaboration with the Margaret River Wine Industry and 70 industry volunteers at the annual coastal rehabilitation event at the rivermouth
- Flagship 20th anniversary WA Beach Clean Up Sip n Sort event in partnership with Tangaroa Blue and Margaret River Brewhouse
- WSL 'Activation' for young surfers at Grunters Beach, laying brushing to close off sensitive areas
- Coastal Walk at Talinup Boodja (Augusta) with Wadandi Pibulmun Yunungjarli elder and custodian Dr Wayne 'Wonitji' Webb – at full capacity

Youth Marine Stewardship Program

Aiming to build a culture of coastal stewardship and giving young locals with a keen interest in the coast and ocean the opportunity to learn from leaders in coastal conservation, the participants were mentored and supported to develop their own projects. In collaboration with local groups and marine experts, they built leadership skills to effect change and proudly presented significant impact projects at the HEART. These included beach clean-ups, litter station installations, an art exhibition, and the production of locally distributed Dive I.D. slate.

"The first summer here, the dam was like a nutrient soup. We're aiming to improve water quality by stabilising the banks and reducing sediment and nutrient runoff."

"At the same time, we're rehabilitating otherwise bare areas of the property with local species and enhancing the natural environment for the long term. We're particularly excited to encourage local birdlife. We're incredibly grateful for the generous in-part donation of around 900 tube stock, along with stakes and tree guards."

- Ben McCarthy, Empire Retreat and Spa owner

CAPE NATURALISTE CONSERVATION ENTERPRISE

Imagine a landscape repaired – native plants and animals flourishing in a world-leading example of conservation, by a community working together with a bold shared vision.

The Friends of Meelup, partnering with Nature Conservation, received State NRM funding to implement the Cape Naturaliste Conservation Enterprise over 2024-2027.

We are developing a comprehensive, cross-tenure approach to conservation on the cape, including funding for on-ground work and subsidies for private landowners involved. The CNCE subsidises the cost of weed and feral animal control, revegetation and fencing of creeklines and bushland.

Highlights include:

- Event launch with 70 attendees and special guest speaker Keith Bradby
- First round of feral animal control offered and completed
- Fauna monitoring capturing quendas, western ringtail possums and phascogales on camera
- Sold out cultural burning workshop with Wadandi Pibulmen Custodian Zac Webb, on country
- The coming together of the conservation community on the cape – land managers, 34 land owners and community groups – all working towards the same goal

ENVIRONMENTAL SERVICES

Did you know...

Our trusted team offers ecologically informed advice, plans and on-ground works such as controlling environmental weeds, erosion control and revegetation.

Get in touch to book:

- Biodiversity Assessments – Learn the nature on your property and how to protect it
- On-ground Works – bush regeneration – increase biodiversity on your property, take actions to protect it

Our Environmental Services (available on a commercial basis) operate with the following objectives, to:

1. Invest proceeds back into our not-for-profit organisation to help build resilience and impact.
2. Provide an important service and facilitate the planning and implementation of important work;
3. Build a key dataset to support landscape scale planning.

MARGARET RIVER

NATURE CONSERVATION BOARD

Our volunteer board provides leadership experience and a broad knowledge base. They are passionate about protecting our environment and dedicated to furthering conservation of the region's biodiversity. They are responsible for overseeing the strategic direction of the organisation and are committed to maintaining high standards of governance.

Dr Ann Ward (Chair)

Ann is a doctor who made Margaret River home after moving from the Kimberley where she had spent 26 years as a rural GP Obstetrician. Prior to that, she was a Flying Doctor in Meekatharra for 3 years. She has a passion for bushwalking in wild areas and has worked in various capacities in the Himalaya, Antarctica, the Arctic and Tonga. She was formerly on the Board of Directors for the RFDS WA Section for 9 years and is a founding member of Gija Total Health Advisory group, supporting the Warmun Aboriginal Community. Ann has a strong interest in the extraordinary biodiverse qualities of the Margaret River Region and enjoys sharing her passion with like-minded people.

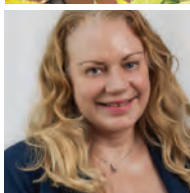

Hamish Worsley (Deputy Chair)

Hamish is an economist and actuary who settled in Margaret River with his family in 2014. Raised on a family farm in southern NSW, he has worked and travelled extensively within Australia and internationally. He is a Director at NMG, an international strategy consulting firm. His passion is spending time in nature and the outdoors with his wife and children.

Michelle McManus (Secretary)

Michelle operates a leading and award-winning regenerative farming business and currently supports Landsmith Collection. Her experience includes urban development, mining, infrastructure, rail, and natural gas as well with SME, the arts and local and state government. She brings experience in stakeholder engagement, communications and management focussing on sustainable development, environmental management, and Corporate Social Responsibility (CSR).

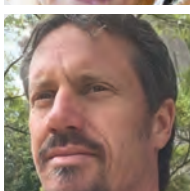

Suzanne Hillier (Treasurer)

Suzanne has a science and law degree from University of Tasmania and a Masters of Environmental Law from University of Sydney. She is an experienced lawyer in the health and environment sectors with many years working in state and commonwealth government in executive management roles. In the last decade she has held directorships with a several not-for-profit community organisations. Suzanne is also a graduate of the Australian Institute of Company Directors and Chair of Trails WA.

Professor Emerita Carmen Lawrence

Former Premier of Western Australia (1990 – 93), Member for Fremantle in House of Representatives (1994-2007) and Minister for Human Services and Health (1994-96), Chair of the Australian Heritage Council (2010-2016), Director of the Centre for the Study of Social Change in the School of Psychological Science at the University of Western Australia. Carmen has a bush property in the Margaret River region and is a regular visitor.

Crispin Underwood

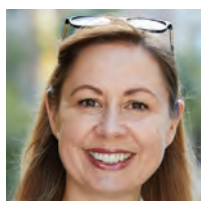

Crispin is the founder and Director of an environmental consultancy specialising in environmental engineering and natural resource management. He has had a varied career with private industry, Government, the not-for-profit sector and in farming. Crispin has a holistic approach, which has drawn from his diverse work history, wide ranging travels, and his nature based interests.

Natalie Chambers

Natalie Chambers Natalie has lived in the Margaret River region for more than three decades and has worked across a wide range of industries at an executive advisory level, concentrated mainly around human resource management, training and legislative compliance. Her extensive fundraising experience includes international projects building houses in Cambodia and cancer care facilities throughout Indonesia.
