 About

Choose the species you are observing:

 **Western Pygmy-possum**  
*Cercartetus concinnus*  
Tiny possum of SW Australia. Fawn to red-brown above and white on underside. Uncommon but not extremely rare. Can be seen in urban areas and natural areas alike.

 **Western Ringtail Possum**  
*Pseudocheirus occidentalis*  
Grey to brown above with cream below. Round ears, pink snout. Tail not fluffy and white tipped. Googly bulging eyes. Highly threatened.

 **Honey Possum**  
*Tarsipes rostratus*  
A very small and distinct possum with light brown to grey fur above and featuring three dark stripes down back. Long pointed snout is characteristic of this species.

 **Common Brushtail Poss...**

Western Ringtail Possum
