

ARUM LILY BLITZ

Undertaking your own arum lily spraying?

If you plan to undertake arum lily spraying yourself we can help by providing **FREE** herbicide and instructions on how to spray.

The herbicide chlorsulfuron is highly effective at killing arum lily plants and should be applied when the plant is actively growing between July and October. The ideal window of time is when about 50-70% of the flowers are present.

Please note that Roundup (glyphosphate) is ineffective at killing arum lilies.

Free herbicide and instructions can be collected at the following locations and times. Before you undertake spraying, we recommend that you watch the spray instructions video that can be accessed at www.natureconservation.org.au

Contact arumlilyblitz@natureconservation.org.au or call Nature Conservation on 9757 2202 for more information.

Location	Time
Augusta True Value 22 Eliis St Augusta	Monday – Friday 8 am – 5 pm Saturday 8 am – 12 pm Sunday 9 am – 1 pm
